

The choice Leo XIV
names at ¶ 9:
Babel or Jerusalem?

Babel — the default platform

Capital gathered at one
node

Labor given by many;
no continuing claim

Data harvested;
contributor owns nothing

Returns flow upward
to the tower's directors

Dispersed effort

Nehemiah — the partnership structure

Capital allocated section
by section, each to its
own builder

Labor protects the
laborer;
each builds adjacent
to what she owns

Materials remain with
the builder who placed
them

Return shared: the city
stands because every
section stands

Accountability at every
joint

Dispersion falls
on the laboring nodes

joint;
the failed section falls
on the family that built it

Doctrinal read: *mutuum*
dressed in monumental
architecture

Doctrinal read: *societas*
in built form — the
lawyer must draft it
